
Hi, I'm a designer who's been working in the industry for a number of years. I'm here to share with you how you can easily learn web design at home for free! I'll show you step-by-step how to develop your skills using HTML and CSS using my free guide that includes: a) 33 exercises b) 35 video tutorials (HTML5 and CSS3) c) 25 screencasts (Firefox Developer Edition and Chrome Developer Tools plugin) d) 3 quizzes (optional).

The first section is designed to help you learn the basics of HTML and CSS. You'll then move onto more advanced topics that include responsive design, HTML5 and CSS3 techniques. This article will be available in both English and Spanish, so if you prefer to learn in your language please choose the version you want to read. I recommend not switching languages during the course as it could get confusing. If you have any questions or comments please leave them below. I always reply to my readers. Thanks!

Section A: HTML and CSS Basics The first section is ideal for anyone who has no experience with HTML or CSS. You'll learn the fundamentals of these two languages and how they work together to build beautiful websites. Here's a sneak peek of what you'll learn: "Introduction to HTML and CSS" In this video I show you the basics of HTML and CSS. I explain how they work together, why they're important and give you an overview of what you'll learn in this course. "Code Your First Website using HTML5 and CSS3" In this video we start by building a beautiful website using only the "div" element, then we add some style to make it look better! We finish by exploring some best practices for structuring your code. "Responsive Web Design with Media Queries" You'll learn how to make your website look great on all screen sizes and how media queries can help us achieve this. This video also shows you how to make your code easier to read and reuse. "Testing Your Website in Different Browsers" Learn how to test your website in various browsers and even fix any cross-browser compatibility issues that might appear. "Additional CSS3 Features" Learn about some cool CSS3 features such as RGBA, box-shadow, transitions, transforms and more! "Further HTML5 Enhancements" Discover all the exciting new HTML5 elements and learn how they work together to build beautiful websites.
